Job Title: Solar O&M Engineer

Company: Deep Tara Enterprise LLP

Location: Matunga West, Mumbai

Industry: Solar EPC (Engineering, Procurement & Construction)

About Us:

Deep Tara Enterprise LLP is a growing Solar EPC company focused on delivering high-performance solar solutions for Commercial & Industrial (C&I) clients. We are looking for a reliable and proactive **O&M Engineer** to ensure seamless operation, maintenance, and performance optimization of our rooftop solar installations.

Key Responsibilities:

- Execute preventive (AMC) and corrective maintenance of rooftop solar PV systems.
- Monitor system performance through remote portals and on-site inspections. Identify underperformance, faults, or areas for improvement and take corrective action.
- In case of system failures or performance issues, quickly identify, troubleshoot / repair the problems, including electrical faults, equipment malfunctions, and wiring issues etc.
- Ensure timely resolution of system issues to minimize system downtime.
- Prepare and submit report of maintenance activities to management and customer.
- Coordinate with vendors and technicians for repairs, replacements or module cleaning.
- Serve as the primary technical point of contact for clients, addressing O&M-related queries and maintaining positive customer relationships.
- Stay updated on industry trends, new technologies, and advancements in solar energy systems to recommend improvements or upgrades.
- Perform any other responsibilities as assigned by the organization.

Qualifications & Skills:

- **Diploma / Bachelor's degree in engineering with 2-5 years of experience** in solar power projects O&M.
- Solid understanding of solar PV systems and electrical components, ability to identify and troubleshoot the breakdown.
- Proven ability to optimize plant performance and to meet guaranteed generation to customer.
- Strong analytical, problem-solving, and communication skills.
- Willing to travel to various project sites as needed.

Salary: Upto Rs. 50,000/- per month.
